Product Description:

One of the standout features of these bubble bags is their shock absorption capability. The air-filled bubbles provide a cushioning effect that helps to absorb shock and prevent damage to your fragile items. This makes them an ideal choice for shipping delicate items like electronics, glassware, and artwork.

In addition to their shockproof design, these poly bubble bags are also waterproof, ensuring that your items stay dry and protected even in wet conditions. This makes them a great choice for anyone who needs to ship items that are susceptible to water damage.

These bags are also tamper-proof, thanks to their durable construction and strong adhesive seal. Once sealed, the bags cannot be opened without tearing, providing an added layer of security for your shipment.

These bubble bags are versatile enough to be used in a variety of applications, including shipping and packaging, as well as for storing and transporting shoes and clothing. And because they are available in custom sizes, you can choose the perfect fit for your specific needs.

Support and Services:

Poly Bubble Bags are designed to provide cushioning and protection for a variety of products during transportation and storage. These bags are made with a combination of polyethylene and bubble cushioning to create a durable and lightweight packaging solution.

Our technical support team is available to assist with any questions or concerns regarding the use of our Poly Bubble Bags. We can provide guidance on the appropriate bag size and thickness for your specific product and shipping needs. In addition to our technical support, we also offer various services to help streamline your packaging process. Our custom printing options allow you to brand your bags with your company logo and information, while our just-in-time delivery program ensures that you always have the right amount of bags on hand without taking up valuable warehouse space.

FAQ:

Ask: any size you can do?

Answer: The custom requirement for silk screen printing is to use the existing size for simple printing, the size can not be customized, but you do not need to worry, because we have a lot of colors and sizes to choose from.

Ask: Could I use the color I like most?

Answer: Sure, the color is optional (as per pantone color).

Ask: I want to make the sample, how about the cost?

Answer: It depends on the bag size and printing logos, we calculate the sample cost.

Ask: How can I get the sample?

Answer: Usually we use the Courier service (UPS, TNT, Fedex, DHL, EMS), you should pay the sample fee first, then it will take 3-5 days (depends on the distance) to reach your place.

Ask: How to ship goods to us?

Answer: usually FOB Shenzhen/Guangzhou and CIF your port. EXW is also OK. Shipping by sea, by air, by express are no problem.
