Product Description

Eco Friendly Biodegradable PLA Cornstarch Express Bags Customizable Color / Stretchable

Product Description:

The corn starch used in the main ingredient of our PLA corn starch bags is derived from corn, is a renewable resource, and when processed in a compost environment, it only takes 180 days to degrade. This means that our fully degradable bags do not cause plastic waste to accumulate in landfills and oceans. We can customize the color and thickness of the bag according to your needs, and can print your company's logo.

Of course, our PLA corn starch bags are also very durable, they can withstand wear and tear, suitable for express packaging. Whether you need a ziplock bag or a delivery bag, it can be a reliable choice for your packaging needs. In summary, our 100% biodegradable polylactic acid cornstarch bag composed of PBAT, cornstarch and PLA is not only robust, but also biodegradable and is an environmentally responsible alternative to traditional plastic bags that are eco-friendly, customizable and durable. So, if you're looking for them, try our PLA cornstarch bag
